

1. Stick this piece of paper to a piece of card.
2. Cut along the dotted lines with a pair of scissors
(mind the pink bits, they're your fingers!)
3. Slide the bottom lip section through the cut in the bottom of the mouth.
(you could glue a lolly stick or a straw to the handle and another to the back of the mask to give it further support)
4. Have your human puppet hold the mask in front of their face and speak for them, moving the mouth in time to your words!
